

**Special Notice.**  
We take pleasure in informing our readers that we have made arrangements with the following gentlemen to sell the DAILY NEWS every day, viz: W. A. Barber, Charles E. Hammett, Jr., B. J. Tilley, and A. J. Ward. We shall supply these gentlemen with the papers as early as possible in the morning, and hope that some of our friends will be accommodated by this arrangement; it is certainly a desirable one to us. We call for our paper has now become a matter of some consequence.

**ON THE OUTSIDE OF THIS ISSUE.**—First Page.—Interesting to Farmers; Bones for Grape Vines.

**The Future Harvest.**

The interest everywhere felt in the prospects of harvest in the future, causes a drive in the country—always agreeable—to be, just now, doubly enjoyed. A hasty glance of this kind over the farms in the vicinity of the city has been productive of grateful results in our own case. From many circumstances we had concluded that few indications of ultimate abundance would be observed upon casual inspection. The long continuance of cold weather throughout the entire spring; the remarkable obscurity of the sky during the same period; and the consequent dampness of the atmosphere, even when the earth was not deluged with rain,—had combined, it was presumed, most materially to injure, if not thoroughly to blight, the hopes of the husbandman. But this opinion has been greatly changed. The aspect of the country is cheering to a high degree. Crops, though backward doubtless, do not promise ill. Potatoes have not presented a more favorable appearance for a course of years. Grass is heavy upon the meadow-land. In the cornfields, where the least encouraging signs are naturally to be encountered, vegetation is tardy indeed, but by no means sickly. With regard to grain of other sorts we can give no definite report, though we remember to have seen, here and there along our route, very fine patches of oats and barley. The present year has seemed extremely unpromising to early maturity in all kinds of produce, and so fair a state of advance may well awaken gratitude no less than surprise. When it is considered that summer is yet to come—everything rears a smile of opulence.

In relation to another part of our subject, we crave the indulgence of a few words.—The apple orchards of Rhode Island, once so white with the blossoms of spring, and so lowly bent with the heavy fruit of autumn display, to-day, symptoms of unthrift and decay. Age has generally dried the juices of these famous trees. No care nor expedient can possibly renew a portion even of their pristine glory. To the enterprise and, forthwith of the living generation is here commended the task—pleasant from association and from the universal spirit of benevolence—of providing for their children as did their fathers. Interest, and pride, and affection alike conspire to indicate the propriety and the benevolence of such a labor. But a few days ago attention was called—we trust with some effect—to the importance of rearing trees. In this paper we would insist upon the evident duty of every proprietor of land to devote some portion of his possessions and of his exertions to the nourishment of fruit trees and of orchards. No such abundant or delightful source of luxury as fruit exists upon the earth beneath or in the waters under the earth. Regarding the facilities for its culture, no means of enjoyment is so shamefully neglected.

While writing we gazed over a picture of spreading branches bowed with the ripened hopes of October. A little company of study men, and blooming maids, and dimpled children, are nestled among the leaves, and scattered around the sward, intent upon gathering the golden harvest. With laughing but earnest zeal they heap the treasures of the Orchard within its shade, balancing in a thankful mood the height of the mounds with the long hours of approaching winter nights. And when the snows of January beat against the cottage windows, and the same fragrant apples are brought up from the warm cellar where they lie unfrozen—not only the Giver of all Good will be remembered, and the fair October evening when the fruit was ripe for gleaning,—but when the kind hands, which wisely mindful of prosperity, plant, and trained, and grafted the infant trees.

No less than five hundred and thirty seven Mormons arrived at Philadelphia on Friday. They came from Europe and their destination is Salt Lake. Happily a large portion of the company were females.

Mr. Philander Doestick has just become part-proprietor of the New Orleans Picayune.

The people of Boston are quarrelling over the oration of the Rev. Mr. Alger, who gave offence by his allusion to the appearance of Senator Mason at the Bunker Hill celebration. The Board of Aldermen have refused to extend to the orator the compliment of printing it. Whatever may be thought of the propriety of giving such prominence and showing such honors to a man who had taken pains to insult a Senator from Massachusetts, we do not think that the fourth of July oration before the city authorities was the piece to rebuke it. It is following the very bad taste that is seen in South Carolina, where the celebration of the day is almost always bitterly partisan.—*Prov. Jour.*

**LOCAL NEWS.**

The weary and dreary prevalence of Easterly winds and mists, may well have damped the hopes of all Newport in respect of the favorableness of the present season.—But we can see no cause to apprehend a diminution in the number of our summer visitors, whatever may be said about the length or shortness of their stay. Those who possess experience in such matters, not only predict an unusual influx of strangers during the coming month, but also confidently affirm that this city never so well, as now, sustained its fashionable reputation in the early part of July.

However this may be, it is not unnatural to expect an interval of extreme warmth between the floods of May and June and the frosts of autumn. Such an interval can only be passed with pleasure at Newport, as thousands will testify when it arrives. Were the decrees of Fashion less imperative, or less egregiously absurd, the fairest charms of Aquidneck would not be continually lost to so many of her warm admirers. But so long as the last day of August gives the general signal of departure, will the true beauties of our climate remain unknown. In September, when the leaves are olive, and in October, when they slowly change to golden brown, come the loveliest days of all the year. The sea breeze then tempers the air to the highest degree of elasticity. The hazy Indian Summer suggests the legends and the council fires of the Narragansetts. Nights made radiant by the harvest moon, display fuller heaps of yellow corn than ever gladdened the sight of the settlers of the island, or were ever bruised between the millstones of the "Old Stone Mill." Possibly such scenes have no interest for a mere seeker of excitement; they certainly must afford pleasure to all who love true pleasure. We shall never, for ourselves, confess that justice has been rendered to the natural qualities of Newport as a watering place, until the beginning of autumn is but the heyday of a fashionable season.

Dr. Sampson, of Boston has arrived in this city, and taken rooms at the Island House, High Street. The high reputation of this physician has been fairly carried by his proficiency in Medical Science. His system is purely vegetable in all its material and no other examination of the patients than simply holding him by the hand, is requisite in order to enable the Doctor to decide upon the ailment. Invalids are examined free of charge; if incurable, frankly told so; and in no case will they be urged to employ medicines after cure is beyond the reach of human power.

The Newport Brass Band assuredly deserves encouragement from the hands of all lovers of enterprise and improvement.—We were highly gratified at the excellent character of its performance on last Monday evening. Taking into account the number of instruments pertaining to the company, and the many obstacles which it has necessarily encountered, we feel justified in urging its welfare and support upon the people of Newport.

From Mr. Robert Wilson there came to our office yesterday, some welcome visitors in the form of strawberries and cherries. Did we not admire politeness scarcely less than fruit we should call the note of Mr. Wilson—"hoping they would prove good"—quite a superfluous affair. Truly, they were excellent, and we are happy in knowing that specimens equally fine may be always procured at the famous stand, 79 Thames street.

The members of the Musical Institute partook of refreshments last evening at Mr. Geo. T. Downing's saloon upon South "Four" Street. We have been requested to state that nothing could have been more attentive and obliging than the conduct of their host upon that occasion.

The beach at present affords a desirable resort. The water has grown warm with the advancement of Summer, and a long array of bathing cars provide abundant accommodations for bathing.

The Summer Term of Brown University closes this afternoon, at four o'clock. Exercises will be resumed at that institution, after the annual Commencement celebrations, next September.

We invite those in search of good accommodations for a family to glance at the Advertisement of Mr. Wm. B. Wilson.

The man who spells God with a small g, is a member of the Wisconsin bar. He is a man of superior natural abilities, and an eloquent speaker, but being very deficient in early education, he occasionally makes the ludicrous blunders which have rendered him famous. He was accusing his opponent of acting fraudulently. "Yes, gentlemen," said he, "this whole transaction appears to me to be a fraudulent one. Upon every event in its whole course I see written the word fraud. Ay, gentlemen, and upon that plaintiff's brow, (pointing fiercely at that meek looking gentleman,) clear as the light of noonday, I see written in characters of the blackest g, y-e—F-r-a-u-d."

A strange circumstance has transpired on Lake Michigan. On the 13th, the day set down by the astronomers for the onset of the comet, the inhabitants of the Manitou Islands were started by a shock which was very perceptible, and a heavy report. The people were unable to account for the strange phenomenon, and imagined that it was caused by the blowing up of a vessel loaded with powder, and actually took horse and crossed to the other side of the Island to investigate the matter.

**THE CAUSE OF MR. MARCY'S DEATH.**

THE FUNERAL ARRANGEMENTS; &c.—Mr. Marcy died at the Sans Souci Hotel, at Ballston Spa, at half-past twelve o'clock, on Saturday. He had not long breakfasted when he complained of a slight stitch in his side which had troubled him for some time past, and then walked about a quarter of a mile to the residence of Dr. More. Not finding the Doctor in, he returned to the hotel, and went to his room, leaving an order at the office that the Doctor should be sent to him. Dr. More soon arrived, and on going to Mr. Marcy's room, and knocking at the door, he received no answer. After a few minutes the Doctor returned to the room, and on opening the door found Governor Marcy lying on his back on a couch, quite dead, with a book upon his breast. He had not been in the room over twenty minutes, and had written just before death, a letter to John M. Batts, of Virginia. He was the guest of John M. Wilder, Esq., at Ballston.

The Common Council of Albany met yesterday, and sent a deputation to accompany the remains. The Burgesses Corps also sent a deputation and will meet the remains at the station, and convey them to the Capitol. Gov. Marcy's wife, and the rest of his family, were absent at the time of his death.

The citizens of Albany invite the friends of Mr. Marcy in New York and other cities to be present on the occasion of the funeral services, on Wednesday, at two o'clock, P. M.

Gov. King, Hon. Hamilton Fish, and Hon. Washington Hunt have signified their intention to be present, and Maj. General Wool has accepted the offer to act as Grand Marshal of the day.

At Sturbridge, Mass., the birth-place of the late Hon. Wm. L. Marcy, the bells were tolled during the day, minute guns fired and the flags draped in mourning and placed at half mast, as a token of respect to his memory.—*N. Y. Mirror.*

**SPECIAL NOTICES.**

**ALPINE HAIR BALM.**

Restoring Gray Hair to its Original Color.

WARRANTED to cure Baldness, Scurf, Dandruff, itching and all diseases of the skin. This Balm gives the scalp a new and healthy action; restores the coloring matter to the roots of the Hair, which passes through the Hair, and gives it a natural color without the use of Hair Dye.

Hundreds of preparations have been introduced, pretending to preserve the Hair and keep it from falling off, composed of Oils, Alcohol and other deleterious materials, and all to no use. Hair Dyes have been introduced that do not give the Hair a natural color, besides being troublesome to use. This Balm is not a Dye. Knowing that a preparation was needed to do what was required for the Hair, the proprietor was induced to experiment, and he could obtain an article that would be the exact remedy. It is soothing and efficient, always all irritation of the scalp, thereby stopping that troublesome itching. It cures Dandruff and Scurf, and when the Hair has turned gray it will bring it back to its original color, be it Black, Brown or Auburn. It makes the Hair soft and glossy—prevents it from falling out, as will be seen by using this Balm for only a few days—life will be given to the roots of the Hair, and growth will soon appear.

Growth does not take place at the end of the Hair, as will be seen in persons who have their Hair dyed. If you examine gray hair that has been colored for a week, you will find towards the roots that the hair has come out gray, hence it is necessary to have the field at the roots of the hair healthy, that the whole hair may be a natural color. Each hair has a root in the skin, and is of itself a hollow, gray tube, through which there is a constant circulation of the pigment from the roots. When this pigment or coloring matter dies out, it leaves the hair hollow and it becomes gray. To invent a Balm that would produce this pigment has become the study of the proprietor. The discovery of the Alpine Hair Balm will do it. It will bring the Hair to its natural color by making anew the coloring matter in the roots of the hair.

It is a mistaken notion that oil or grease will restore the hair, as nothing can be more injurious. The Alpine Hair Balm, will restore the skin and save the hair of those who have been sick with fever or any disease.

**RATHBONE'S** Ambrotype Gallery, AT APOTHECARIES' HALL, WASHINGTON ST. (Near the State House).

**THE** only place in the city where a good picture can be obtained. The brilliancy and strikingly life-like expression of Rathbone's Pictures, are daily commencing them to all lovers of Perfect Likenesses. The peculiar nature of Rathbone's chemicals and superior instruments (for which he has spared no expense in selecting) are such as to render his pictures almost nature itself, and they are entirely devoid of that sickly, death-like appearance which is generally attached to Ambrotypes executed by those who do not understand or have no taste for the art. To all those who may want a good picture, whether Ambrotype or Melanotype, I would extend to them an invitation to give him a trial, and if it is not satisfactory, no charge will be made. A large assortment of every thing pertaining to the profession may be found at Rathbone's Rooms, F. B. RATHBON, Artist.
